Regarding claim 2, "Routing", "The satellite system" should be changed to "rout" and "the satellite system"

Regarding claim 3, "Receiving", "Communicating", "The processing device" should be changed to "receiving", "communicating", "the processing device".

Regarding claim 4, "The processing device/base station", "The main function", "To" should be changed to "the processing device/base station", "the main function", "to".

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 3-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed

invention. "Circuit data" and "the incoming wireless voice channel" were not described in the specification of application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 ~~is~~ rejected under 35 U.S.C. 102(b) as being anticipated by Chambers (US 6,256,497 B1).

Regarding claim 1, Chambers discloses a method comprising: communicating the wireless signal to the user's PSTN connection from a wireless system via a processing device (see fig. 2; from UT1 to satellite 3a to SAN1 to MSSC1/VLR1 SAT to PSTN to telephone 7); Communicating the wireless signal from the user's PSTN connection to a wireless system via a processing device (see fig. 2, col. 6, lines 8-22).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2681

4. Claim 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chambers (US 6,256,497 B1) in view of Cutler, Jr. et al. (US 5,862,479).

Regarding claim 2, the method of Chambers does not mention routing voice, data and message by utilizing a satellite system; the satellite system will communicate voice, data and message to a mobile unit directly; the satellite system will communicate voice, data and message to a processing device directly. However, Cutler, Jr. et al. discloses routing voice, data and message by utilizing a satellite system; the satellite system will communicate voice, data and message to a mobile unit directly; the satellite system will communicate voice, data and message to a processing device directly (see fig. 1; col. 2, line 60 to col. 3, line 7). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the above teaching of Cutler, Jr. et al. to Chambers so that user can send email message, video signals or voice via satellite system.
